PROVISIONAL FINANCIAL STATEMENTS

The Corporate Finance Advisory and Corporate Dealing Securities division reported a Profit after Tax of Rs. 22Mn for the quarter ended 30 June 2026 (1st quarter of 2025/26 – Profit after Tax of Rs. 587Mn).

The Wealth Management division reported a Profit after Tax of Rs. 6Mn for the quarter ended 30 June 2026 (1st quarter of 2025/26 – Profit after Tax of Rs. 27Mn). The assets under management of the division stood at Rs. 93Bn as of 30 June 2026 (31 March 2026 – Rs. 96Bn).

The Stock Brokering division recorded a Profit after Tax of Rs. 24Mn for the quarter ended 30 June 2026 (1st quarter of 2025/26 – Profit after tax of Rs. 32Mn).

8 Financial instruments- fair value measurement

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements in accordance with SLFRS 13.

Level - 1
Financial instruments that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Level - 2
Financial instruments that are measured at fair value on a recurring basis. As market quotes generally are not readily available or accessible for these securities, their fair value measures are determined using relevant information generated by market transactions involving comparable securities.

Level - 3
Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

8.3 Measurement of fair values

8.3 (a) Valuation techniques and significant unobservable inputs

The following table shows the valuation techniques used in measuring Level 2 and Level 3 fair values, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Type	Valuation Technique	Significant Unobservable Inputs	Inter-relationship between Significant Unobservable Inputs and Fair Value Measurement
Debentures	The valuation model is based on Yield Curve of the Government Securities. Yields relating to Government Securities based on the remaining maturities of the respective debentures is interpolated in the valuation considering the investee companies' risk premiums.	Risk premium of the investee companies (lies between 1.65% and 4.33%)	The estimated fair value would increase/decrease if risk premium of the investee company is lower or higher
Unit Trusts	The fair values are based on the Net Asset Values published by the respective unit trusts.	Not applicable	Not applicable
Equity Securities (Financial assets - fair value through other comprehensive income)	The fair values are based on price to book value approach.	Discounting factor used to arrive the unlisted price	The estimated fair value would increase/decrease if the discounting factor used by investor company is lower or higher
